(02) Ms. Munirah Hamzah ; Malaysia

I'm really happy to be here in Sri Lanka and joining the training course. It was my first time joining the training course in the field that I like. There're many new things that I learnt from this course which have different in the techniques used. ^{for example} I enjoyed being here learning knowledge about ants that can improve my skills in the field. ~~that we~~ shared a lot of knowledge about ants with Prof. Siyani Dias, Prof. Yamane, Mr. Ghulam and Sri Lanka. It was a great experiences and opportunities to be here. Joining this course have made me want to continue my studies to the next level in the future. Meeting with the expert made me realize that I am not alone in this field and I have many expert to be contacted in the future if I have any problems in the identification. Meeting experts was a biggest opportunities for me to be able to talk about ants in my life. Thank you to Kelaniya University for this opportunities and Prof. Siyani Dias for accepting my request to ~~join~~ ^{use} the course even I just a master coursework student who is really interest in ants. Thank you so much. Glad to be here in Sri Lanka and joining the training courses.

(03) Mr. Noor Izuwan ; Malaysia

It is my biggest opportunity to learn more on ants especially from expert taxonomy 'Prof Soti Jensen'.
The course is very good and was suggested to join by many other people that are love on ants.
More training is suggested to be done to increase the knowledge on ants systematics
and taxonomy around Asia.

Thank You

(04) Mr. Agasthya Thobagamuwa; Sri Lanka
(University of Colombo)

First of all I must thank Prof. Dias for organising such a great opportunity for interested
& student free of charge, which is highly unlikely regarding the other workshops I've attended.
The workshop I think is excellent for students to learn the basic techniques of field
collections and identifications. The workshop provides a hands on experience to all
participants, which is very good and useful.
I wish Prof. Dias all the best and to organise such workshops every year and
the only suggestion I have is to increase the number of days of the workshop.
All the best!

Thank You
